The Smart Governance & Smart Government Track is a special track at the ICDS 2017 conference. The aim of this track is to demonstrate current and emerging smart city trends, mainly -but not limited- with regard to smart government. It focuses on the orchestrated interplay and balance of smart governance practices, smart public administration, smart resource and talent leverage in urban and regional spaces facilitated by novel uses of ICTs and other technologies, in particular the Internet of Things.

Areas of focus and interest include, but are not limited to, the following topics:

- Governance in smart cities (models, experiences, etc.)
- Smart governance and the creation of public value in smart cities
- Theoretical foundations on smart government and success empirical experiences
- The roles of government for smart city development (i.e., promotion push, policy, standards, start-ups)
- E-participation and smart cities: new kinds of interactions between citizens and other societal stakeholders (triple/quadruple helix, public-private partnerships, citizen participation)
- Models for managing public services in smart cities
- The Internet of Things and co-production, interoperability
- Smart technologies implemented in public sector entities for improving transparency and interoperability (open data, disclosure of information, etc.)
- Smart devices and their novel use in public management
- Smart (technology-facilitated) practices such as payment systems, identification systems, etc., and their relationship with the governments
- Regulations and public policies used for implementing smart technologies in public administrations
- Organizational issues in the implementation of Smart technologies in public sector entities
