Special track

BIOSEC: Biometric Security

Chair and Coordinator

Wojciech Wodo, Research Assistant, Wroclaw University of Science and Technology, Poland

wojciech.wodo@pwr.edu.pl

along with

SECURWARE 2017, September 10 - 14, 2017 - Rome, Italy

The Eleventh International Conference on Emerging Security Information, Systems and Technologies

<http://www.iaria.org/conferences2017/SECURWARE17.html>

Biometry is rapidly developing area of science and technology, one can observe new solutions embedded in mobile devices or banking systems. Biometrics uniqueness may be very valuable for security issues, but simultaneously it has to be treated with caution and protected against illegitimate usage of third party. Biometrics could revolutionize security systems, removing passwords or hardware keys, if and only if users will trust them and feel comfortable about exposing their biometric data.

Our role as researchers or manufacturers is to provide such solutions which fulfill new scope of users demand - flexibility, easiness and security at once. It is a great challenge, but thanks to biometry it is possible to achieve this goal.

Topics include, but not limited to:

- Biometrics security and privacy
- Biometric data protection, template protection
- Security solutions based on biometrics
- Mobile biometrics, smart cards
- Multibiometrics
- Healthcare and e-health
- Biometrics vitality tests
