along with

eLmL 2017, March 19 - 23, 2017 - Nice, France

The Ninth International Conference on Mobile, Hybrid, and On-line Learning

<http://www.iaria.org/conferences2017/eLmL17.html>

Unlike traditional applications, Web systems and on-line resources are accessible anytime, anywhere, via a device equipped with an Internet connection. Content can be customized not only for user groups, but also for presentation on different devices – including, e.g., PDAs, mobile phones, smart devices - further extending the user's ability to receive and interact with information.

This special track is focused on the possibilities offered by the Web to the field of music education, where new approaches and technologies are emerging thanks to the ubiquity and pervasiveness of network-attached devices.

The list of desired topics includes, but is not limited to:

- On-line archives of music resources
- Interchange formats for music information
- Web services and advanced interfaces for music learning and teaching
- Geographically-distributed music performance
