along with

SENSORDEVICES 2018, The Ninth International Conference on Sensor Device Technologies and Applications

September 16, 2018 to September 20, 2018 - Venice, Italy

<http://www.iaria.org/conferences2018/SENSORDEVICES18.html>

The diffusion of commercial sensors available to customers for monitoring well-being drives at least a double consequence:

(i) On one side, such cheap sensors could become useful also in more professional settings, where there is a need to ambulatory monitor health;

(ii) On the other side, they a stimulus to further improve such sensors and processing tools in order to go deeper and deeper in both well-being and health ambulatory monitoring.

The special track aims at understanding state-of-the-art and foresight development in such emerging field of research related to particular illnesses, including elderly.

Prospective authors are invited to submit original papers on topics/devices/systems to monitor/control/manage health and well-being situations including, but not limited to:

- Sleep
- Stress (heart rate variability)
- Equilibrium
- Noise
- Panic
- Rare diseases
- Special pains
